

# Defense Engineering Manufacturing Experience

---

Anchal Industries is a precision engineering company specializing in the manufacturing and development of high-quality engineering components for defense and industrial applications. With 25+ years of experience in the defense domain, we possess strong expertise in product development, precision manufacturing, and stringent raw material grade selection as per critical application requirements.

Our team has extensive knowledge of defense engineering standards, special materials, and precision machining processes required for high-performance and mission-critical components. We are capable of handling customized development projects, prototype manufacturing, and batch production with strict adherence to quality and technical specifications.

We have vast experience in casting followed by machining and forging followed by machining, including high-accuracy parts manufacturing for critical engineering applications.

## **Our Expertise**

- Precision CNC & VMC Machining
- Defense Product Development
- Critical Engineering Components
- Casting Followed by Machining
- Forging Followed by Machining
- Stringent Raw Material Grade Selection
- Prototype & Batch Production
- High Accuracy Machining & Inspection
- Customized Manufacturing Solutions

## **Our Strengths**

- 25+ years of defense engineering experience
- Knowledge of critical raw material specifications
- Skilled technical and manufacturing team
- Advanced machining and inspection facilities
- Consistent quality and on-time delivery
- Customer-focused engineering support

We are committed to delivering reliable, durable, and precision-engineered solutions that meet the demanding requirements of the defense and engineering sectors.
